

ASUS PadFone X Speaker Replacement

Did a speaker let you down? Find out how to replace it!

Written By: William Beale

INTRODUCTION

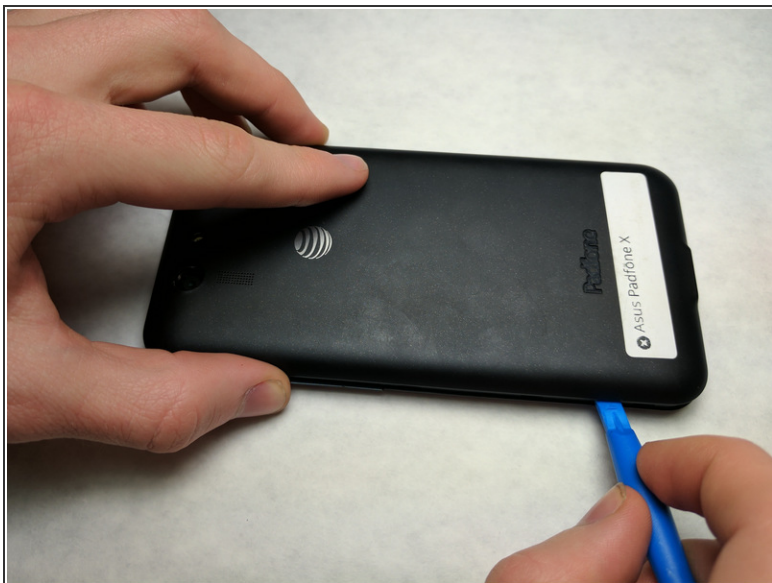

Is your speaker broken? Would you like to listen to music or use the speaker phone function but are plagued with silence? This replacement guides shows how to replace the speaker component of the ASUS PadFone X.

TOOLS:

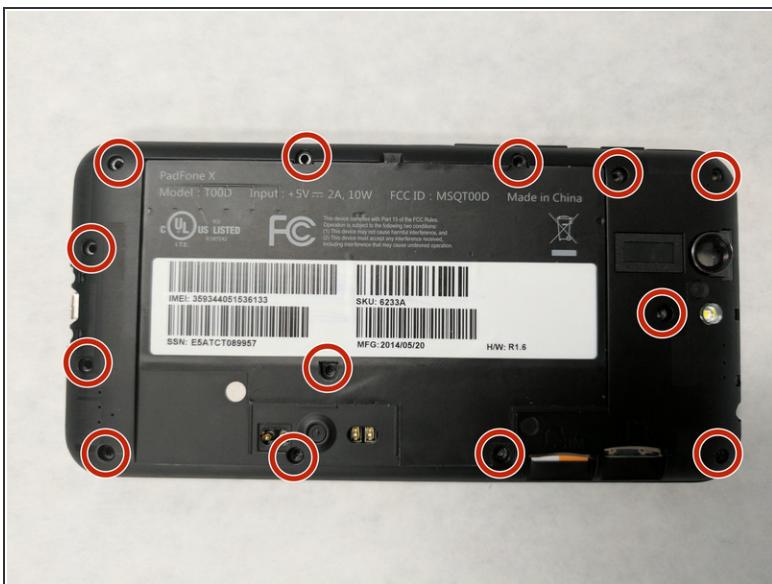

- [T5 Torx Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Speaker

- Pry off the back cover with the blue plastic opening tool. This may require a bit of force.

Step 2

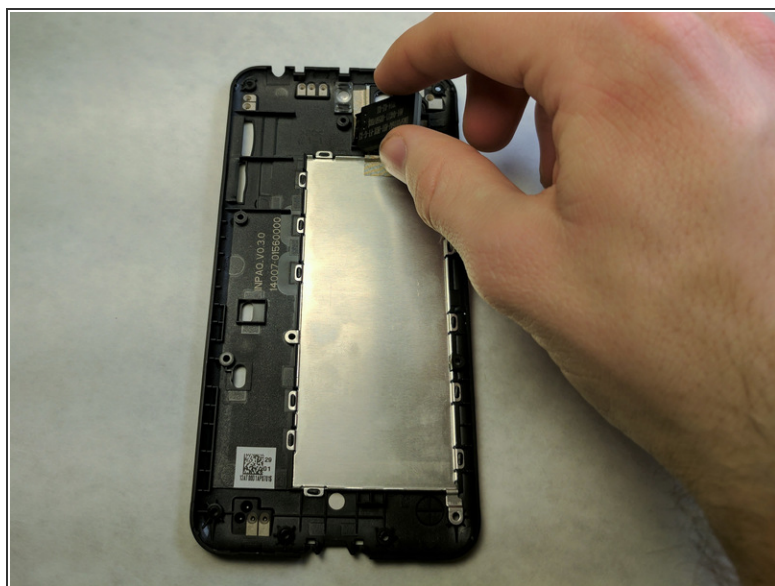

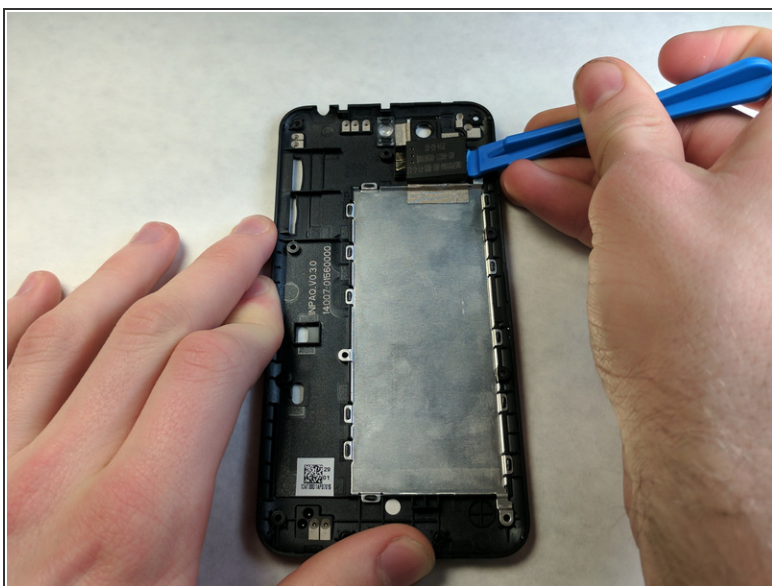

- Remove the thirteen 3.6mm screws using the T5 Torx Screwdriver.

Step 3

- Once the screws are removed, the mid-frame can be lifted off of the phone. The speaker is on the mid-frame.

Step 4

- Use the plastic opening tool to pry out the speaker. It should come out fairly easily.
- Pick the speaker up and out of the mid-frame.

To reassemble your device, follow these instructions in reverse order.
